

<b>POLICY NAME:</b>	QUALITY & ENVIRONMENTAL MANAGEMENT POLICY	<b>POLICY NO.</b>	QY-001-PY.01
---------------------	---	-------------------	--------------

## 1 PURPOSE

The purpose of this policy is to clarify Neumann Contractors' commitment and intentions towards quality and environmental management.

## 2 SCOPE

The policy applies to all divisions of Neumann Contractors, their personnel and others acting on behalf of the company.

## 3 POLICY STATEMENT

Neumann Contractors is a civil engineering contracting company, which strives to strengthen its position as an industry leader in dredging, earthworks, infrastructure, land development services, steel fabrication and industrial coatings.

We are committed to delivering projects that satisfy the requirements and expectations of our clients, business associates, and the wider community, through timely performance, cost-efficiency, attention to quality, and commitment to ecologically sustainable development.

Provision of this service shall be underpinned by the implementation and continual improvement of an integrated management system, consistent with the elements of ISO 9001:2000 (Quality Management Systems) and ISO 14001:2004 (Environmental Management Systems).

Quality and environmental care is everyone's responsibility, and all personnel are obliged to conduct their work with regard for the policies and procedures, which form the management system.

To achieve these objectives we will –

- Provide products and services that meet or exceed the standards prescribed in relevant agreements, contracts, codes and statutory requirements.
- Identify, assess and manage risks to clients, employees, contractors, the environment, and the community.
- Communicate with, and engage, our clients, government authorities, community and other interested parties, to resolve issues and improve performance.
- Train and adequately resource all personnel in their quality and environmental responsibilities.
- Wherever possible prevent, or otherwise minimise, waste and pollution associated with the company's activities.
- Set, and strive to achieve, measurable quality and environmental targets.
- Monitor, measure and review our performance in a way which potential improvements are identified.
- Embrace and develop innovations which improve the delivery of services.
- Periodically audit, review and revise our management systems to ensure their effectiveness and continual improvement.
